- a) Provide physical therapy
- b) Design prosthetic devices
- c) Administer medications
- d) Conduct medical research

Correct Answer: b) Design prosthetic devices

Explanation: The primary role of a prosthetist is to design and fabricate prosthetic devices tailored to the needs of patients who have lost limbs. This involves understanding biomechanics, collaborating with patients, and ensuring the devices enhance mobility and quality of life. Prosthetists also play a vital role in patient education and follow-up care.

2. Which policy affects prosthetics coverage?

- a) Tax regulations
- b) Medicare policies
- c) Employment laws
- d) Nutrition guidelines

Correct Answer: b) Medicare policies

Explanation: Medicare policies significantly impact the coverage of prosthetic services in the United States. 23. How does legislation impact prosthetic access?

- a) Limits patient choice
- b) Increases wait times
- c) Restricts device types
- d) Defines coverage policies

Correct Answer: d) Defines coverage policies

Explanation: Legislation impacts prosthetic access by defining coverage policies that dictate what services and devices are reimbursable under various insurance plans, including Medicare and Medicaid. These policies can affect patients' ability to obtain necessary prosthetics, making advocacy for favorable legislation essential to enhance access to care and improve health outcomes.

24. What is the purpose of peer support groups?

- a) Limit information
- b) Share experiences and resources
- c) Increase isolation
- d) Reduce communication
