6. What is a common mistake in documentation?
a) Following guidelines
b) Using clear language
c) Leaving out important details
d) Being too detailed

Correct Answer: c) Leaving out important details

24. What should psychiatric nurse practitioners do after a patient visit?
a) Use vague terms
b) Document promptly
c) Forget details
d) Delay recording

Correct Answer: b) Document promptly

Explanation: Psychiatric nurse practitioners should document promptly after a patient visit to ensure that details are accurately captured while still fresh in their minds.
